

GRAND TIME

Decentralized Crowdsourcing Marketplace

WHITEPAPER

GRAND TIME WHITEPAPER

The AI market is booming. The global artificial intelligence market size was valued at USD 93.5 billion in 2021 and is projected to expand at a compound annual growth rate (CAGR) of 38.1% from 2022 to 2030. The irony is that artificial intelligence is neither truly intelligent nor truly artificial. The need for human-powered data labeling only continues to grow:

The 96% of AI & ML companies that needs AI & ML models training are facing these 5 main problems:

- Massive volume of unstructured data
- Lack of workforce to label data
- Labeling speed
- High costs of In-house labeling
- Data quality

At the same time the global poverty rates are rising. Currently, there are 1.9 billion people worldwide who live on less than \$4 a day, which is not enough for sustainable living. People in the developing countries are facing challenging obstacles:

- Lack of financial education
- Lack of income-producing work
- Lack of supporting communities

Grand Time is determined to change these problems by combining the power of blockchain with Artificial Intelligence & Machine Learning Solutions

Grand Time uses blockchain technology to empower people from developing countries to contribute to the booming AI & ML industry. By performing simple data labeling tasks, cryptocurrency enthusiasts around the world can get rewarded with crypto for helping AI & ML companies to get high quality data.

By accelerating the global blockchain adoption, we will help 1.9 billion people from developing countries to learn how to use crypto, and to gain financial freedom by tokenizing their time and turning it into money! At the same time providing AI & ML companies with access to extremely fast, high quality and cheap data labeling

WHAT IS THE GRAND TIME PROJECT?

Grand Time is an ecosystem of powerful solutions utilizing blockchain technology to empower people in developing countries with income opportunities in the Artificial Intelligence & Machine Learning data labeling industry.

Grand Time addresses one of the most serious problems of the AI & ML industry, which is the slow speed & high cost of acquiring quality human-powered data needed to train Artificial Intelligence and Machine Learning models. Grand Time solves this problem by providing AI companies with access to extremely fast, high quality and cheap data labeling.

On the other side, Grand Time enables communities from emerging markets to gain a steady source of blockchain-based income, by empowering them to perform simple crowdsourcing & data labeling tasks that doesn't require any professional skills in exchange to the project native token GRAND.

Our mission is to introduce millions of people from developing economies into the crypto community & blockchain industry with the help of accessible solutions powered by the Grand Token.

HOW WILL GRAND TIME ACHIEVE THIS?

The greatest advantage of Grand Time is simplicity - we empower millions of people to become financially independent through 3 main components of the Grand Time ecosystem:

- 1. Grand School** a beginner-friendly platform, allowing everyone to learn how to perform simple crowdsourcing & data labeling tasks and earn Grand rewards on the platform. As well as basics of crypto and blockchain technology with the help of one on one mentorship of more experienced Grand Time' users.
- 2. Grand Social Mining** - Social Mining is a process in which crypto beginners can earn GRAND tokens by performing simple crowdsourcing tasks that do not require any professional skills. It's a very simple way to earn crypto. Earned Grand Tokens can be easily exchanged to other cryptocurrencies inside of the platform.
- 3. Grand Time Community.** Our community is the most valued part of the Grand Time ecosystem. Grand Time chats are available in different languages 24/7 and help crypto beginners to learn about blockchain while finding new like-minded friends.

In addition to these main 3 components, we are constantly adding new products and features to the Grand Time ecosystem according to our road map. New features are also being added when the community demands it, which guarantees that Grand Time will always remain a cutting-edge project empowering millions of people to use crypto and helping to greatly accelerate blockchain adoption around the world.

GRAND TIME ECOSYSTEM

Grand Time is aiming to be fully decentralized, democratic and community-driven ecosystem designed to empower 1.9 Billion of people in developing countries with access to quality blockchain/financial education and profitable crypto income opportunities. Grand Time consists of multiple different solutions all bound together by Grand Token.

Thanks to all products in the Grand Time Ecosystem & Grand Token that is backed by decentralized decimal time measurement system, even people with no technical background, professional skills and previous blockchain experience can effortlessly start earning, trading, and learning about crypto assets & blockchain world.

GRAND TIME ECOSYSTEM

Grand Token

Grand Time platform has its own currency – Grand Token. Grand is a reference currency for the equity flow & all transactions in the whole ecosystem, powering all products of the Grand Time platform.

Grand Social Mining

Social mining is the core part of Grand Time, as it allows everyone to turn time into token - literally. Register on the platform, perform simple social media tasks by promoting the project or perform GIG tasks ordered by businesses – each task you complete will be exchanged for GRAND rewards.

Grand Crowdsourcing Marketplace

Decentralized Crowdsourcing Marketplace for ordering any simple GIG tasks (Data labeling for AI & ML, search relevance, text classifications, surveys, voting, feedbacks and more...), which are placed by businesses and performed by Grand Time community members for Grand Token rewards through the Social Mining platform.

Grand School

Grand School is a beginner-friendly platform, allowing everyone to learn how to perform simple crowdsourcing & data labeling tasks and earn Grand rewards on the platform. As well as basics of crypto and blockchain technology with the help of one on one mentorship of more experienced Grand Time' users.

Grand Token Deflationary System

All Grand tokens earned on the platform will be able to be exchanged to other cryptocurrencies inside of the platform without moving it on-chain & selling it on external exchanges through the Grand Token Deflationary system. Furthermore, deflationary system works that way, that it burns all exchanged Grand tokens as a deflationary mechanism.

GRAND TOKEN

The blockchain-based Grand Time project has its own currency – Grand Token. Grand works as a reference currency for the equity flow in the whole ecosystem, powering the Grand Social Mining Rewards, Grand Schools education, Grand Crowdsourcing Marketplace GIG ordering requests and Grand Deflationary System trading with Grand App.

The main function of the Grand Token is being the reference currency for all transactions and actions across the Grand Time ecosystem.

The second key utility of the Grand token is the social mining rewards. Social mining allows the user to earn Grand rewards by performing simple tasks generated by Grand Crowdsourcing Marketplace orders.

The third main function of the Grand token is to be the only payment currency to order GIG tasks through the Grand Crowdsourcing Marketplace. Token holders are able to utilize the token to order simple digital tasks (data labeling for AI & ML, surveys, voting, feedback and more...) and get it done by thousands of crypto enthusiast from Grand Time community.

Moreover, staking Grand feature will provide the users with the ability to enhance the rewards generated from Grand Social Mining.

The final core feature of Grand is the ecosystem governing. Holding Grand will empower the token holder to give recommendations and vote on the project development and fund the most interesting projects built in the Grand ecosystem or charity projects.

In order to assure growth of the Grand Token ecosystem, Grand contain not only value growth mechanisms, but also liquidity growth mechanisms and utilities. Because of that, the value of Grand Token will be increasing corresponding to the growth of the ecosystem and the number of active users.

GRAND TOKEN UTILITIES & VALUE GROWTH MECHANISMS:

01.

Reference currency
for the whole
ecosystem

02.

The only payment
currency to order
tasks at Grand
Crowdsourcing
Marketplace

03.

The only payment
reward for performing
crowdsourcing tasks on
the Social Mining
Platform

04.

Trading base for all of
the pairs on Grand
Deflationary System

05.

Advanced internal &
external staking features
allowing the users to
receive a part of the profit
generated by Grand Social
Mining Platform

06.

Referral reward for
bringing new users to the
platform.

GRAND TOKEN TECHNOLOGICAL SPECIFICATION

The Grand Time ecosystem utilizes a ERC-20 based solution. The Grand token is available as a ERC-20 token built on the Polygon Network.

Feature	Grand Token	Bitcoin	Ethereum
Ticker symbol	GRAND	BTC	ETH
Token launch date	01/01/2019	03.01.2009	07/2015
Total supply	Production limited to 10M Grand Tokens as a daily token supply. All unmined & unearned tokens from 10M, are burned daily as a deflationary mechanism.	21,000,000	Unlimited
The circulating supply of coins	Current Minted Tokens for the last 4 years: 1.7B+ (\$13.6B were burned as deflationary mechanism) IDO Tokens: 380M All unsold tokens during IDO will be burned	18.2M+	115M+
Burnable	Yes	No	Yes
Native Blockchain	Polygon ERC-20	Bitcoin mainnet	ERC-20
First launch price	\$0.0001	\$0	\$2.77

The entire Grand Time project is powered by the Grand Token – the first cryptocurrency backed by revolutionary Grand Time Decentralized Decimal Time Measurement System.

The value of time is something that we all know intuitively. We all also know the old saying that “time is money”. Grand Time turns this into reality, by allowing people to literally turn their time into tokens on our platform.

Grand Time approaches time in a unique manner, by using a coherent and easily understandable decimal time measurement system that backs up the Grand Token tokenomics. **How does it work?**

- Each day is divided into 10 equal parts - **10 Grand Hours**.
- Each Grand Hour is **100 Grand Minutes** - 1,000 Grand Minutes a day.
- Each Grand minute is **100 Grand Seconds** - 100,000 Grand Seconds a day.
- Finally, each Grand Second is **100 Grand Milliseconds**. Each Grand Millisecond is worth **1 GRAND**, which gives a total of **10,000,000 GRAND** tokens available daily to everyone.

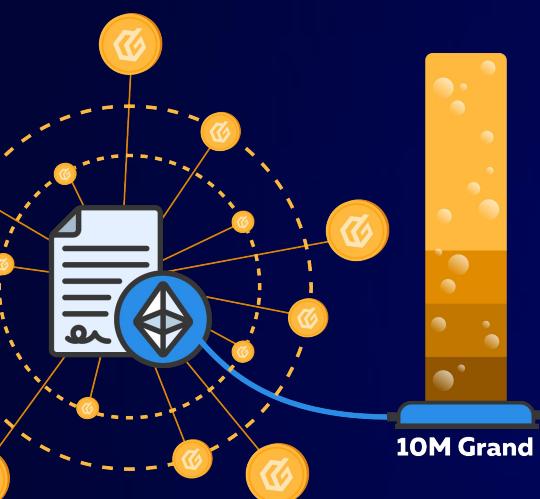

Grand Time's Decentralized Decimal Time System is based on the blockchain, which makes it fully transparent. It's a safe, efficient and easy-to-use method that empowers millions of people to literally turn their time into tokens on our platform.

Decentralized Decimal Time System empowers you to tokenize your time and turn it into money. Thanks to this groundbreaking blockchain-based time system, you can monetize every second of your free time on our platform.

The future of the world's economy is decentralized. Thanks to Grand Time's Decentralized Decimal Time System, Grand Token & Grand Time Ecosystem, embracing this future will become much easier for millions of people around the world!

Revolutionary Tokenomics With Daily Token Supply

Most of the projects in the crypto ecosystem have a limited supply. Some projects issue 10 billion tokens in 10 years, some issue 10 billion tokens one-time. In Grand Time, we have a different approach. We value our time and have compressed it. We have divided it into parts in order to make it more valuable. On our platform, we can earn at all times: even the smallest part of a day can be turned into tokens. Grand only has a limited supply for one day. We value time so much, that's why the daily limit is only 10 million. Every day, the limit resets to zero and every day no more than 10 million Grands are produced. All unused & unmined Grand tokens will be burned as a deflationary mechanism by our smart contract automatically at 00:00 Greenwich Mean Time Zone daily.

1

Smart Contract Produces 10 Million Grand Tokens Every Day

2
Tokens Are Distributed Throughout The Following

3

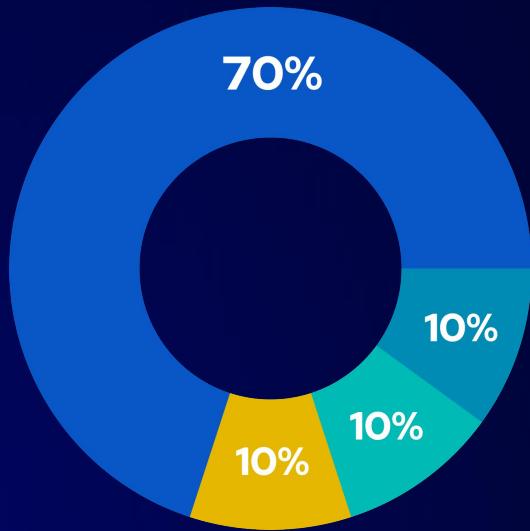

Unused & Unmined Tokens Are Burned Daily as a Deflationary Mechanism

4
The Daily Cycle Resets And Starts Over

Daily Distribution

Grand Total Daily Supply is **10M Tokens**. All unused & unmined Grand Tokens are **burned daily** by our smart contract at 00:00 Greenwich Time Zone as a Deflationary Mechanism

Within 4 years, only **1B tokens** were minted and earned as social mining rewards by platform users and used for project operations, the rest **13.6B tokens were burned**. As the Grand user base and network scales, more labor is needed to earn 1 Grand Token. Grand mining rewards are reduced exponentially.

***Calculates As 14.28% From The Daily Social Mining Earned Rewards**

Example Scenario

1 Grand Time Community

During the day all Grand Time community was performing social mining tasks and earned **500K Grand Tokens** of Social Mining Rewards.

Grand Time Community

2

Community Rewarded

The community will have their rewards deposited at the end of the day to the Social Mining Wallet with the following address:

Funds Get Sent To The Social Mining Wallet Address

0x48Fb4DaACCF53D04275dCcf776e72939004cE79F

3

Other Wallets Distribution

14.28% from the 500K that was earned by the community through mining rewards will be distributed to projects wallets as described by our illustration.

14.28%

Team & Project Operation

71.4K goes to the Team & Project Operation Wallet

0xb74d5D7572F0BC6938a6dc5A0F6df14fE133944

14.28%

Liquidity & Marketing

71.4K goes to the Liquidity & Marketing Wallet

0xae6cC4cF776b5343c2857A776Fdb7A46AE583403

14.28%

Charity

71.4K goes to the Charity Wallet

0xA5b0EbF7868dE373dBDB91AD9306d454690a11D8

Total Of 714.2k Grand Tokens Were Distributed

In total, during the day $500K + 71.4K + 71.4K + 71.4K = 714.2K$ Grand Tokens Were Distributed. The rest 9285800 from 10M were burned as a deflationary mechanism by the Grand Token smart contract. All transactions can be tracked at the Grand token smart contract in the Polygon explorer:
<https://polygonscan.com/token/0xc41214fc9f2bd9705e7a271409471161aa0e8808>

Grand Decentralized Crowdsourcing Marketplace

Decentralized Crowdsourcing Marketplace for ordering any simple GIG tasks (data labeling for AI & ML, search relevance & text classification, surveys, voting, feedback, ...), which are placed by businesses/start ups/marketing agencies and performed by Grand Time community members for Grand Token rewards through the Grand Social Mining platform.

The Grand Crowdsourcing Marketplace will massively disrupt the current crowdsourcing marketplace & data labeling industry by combining the power of blockchain with Artificial Intelligence & Machine Learning technologies.

Grand Time addresses one of the most serious problems of the AI & ML industry, which is the slow speed & high cost of acquiring quality human-powered data needed to train Artificial Intelligence and Machine Learning models. Grand Time solves this problem by providing AI & ML companies with access to extremely fast, high quality and cheap data labeling.

Our solutions incorporate advanced multi-level quality control methods and aggregation tools, auto labeling and verification, and a curated crowd of performers – all supported by our high-performing blockchain infrastructure for reliable fault tolerance and security.

Type of Crowdsourcing Tasks That Can Be Ordered

Data Labeling for AI & ML

- Image/Video Object Recognition & Detection
- Image Transcription or Moderation
- Search Relevance & Text Classification
- Image & Video Classification
- Sentiment Analysis
- Intent Classification
- Audio Annotation

Usability Testing & Comparison

- Platform/Website/App usability testing & feedback with survey
- Designs/Logos/Photos A/B testing

GRAND SOCIAL MINING

Grand Social Mining is a new concept integral to the Grand Time ecosystem. The idea is simple: as users perform GIG tasks generated through Grand crowdsourcing marketplace or refer new people to the Grand Time network, they will earn Grand token rewards.

Their mining rewards will directly correlate to the number of tasks or actions they have taken and new partners they have referred. In other words, the more users and network value they bring to the platform, the more Grand rewards they will earn. All mining efforts and rewards are initially transact via the Polygon Network.

GRAND SOCIAL MINING DISTRIBUTION

The Grand Social mining distribution focuses on tokens as a means of building and governing the Grand Network. This model awards early adoption of the Grand token, as Grand mining rewards are reduced exponentially.

Initially, network growth is driven via larger Grand mining rewards. As the Grand user base and network scales, the Grand network value will increase. Because of this, the lower Grand reward will continue to serve as an effective incentive for Grand mining to continue.

All Grand mining transactions are verified and secured via Polygon smart contracts, providing safe and trusted Grand mining infrastructure. All transactions can be tracked and verified on the Polygon blockchain, creating much-desired transparency for all users and partners in the ecosystem.

GRAND TIME WHITEPAPER

GRAND MINING ILLUSTRATION

In this illustration, we have three users: **Tom**, **Bob**, and **Kelly**. They are new users and initially have 0 Grand each.

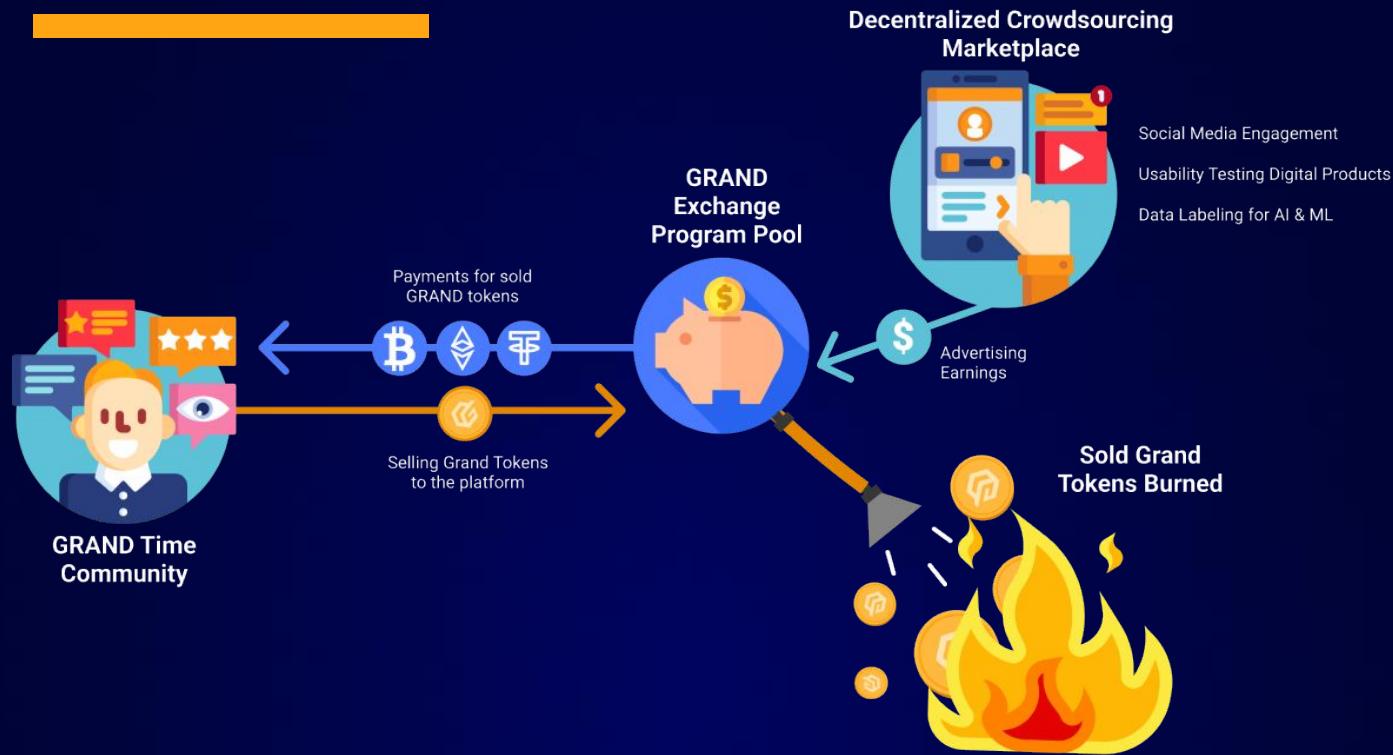

Over one week, Tom completed 500 GIG tasks, and brought 5 referrals to the Grand Time Project. Bob completed 200 GIG tasks and brought 10 new referrals to the Grand Time network. Kelly didn't complete any GIG tasks, however brought 20 new referrals to the Grand Time network.

Using our Grand mining algorithm, while setting the current per GIG task weight at 8 and the referral weight at 50, Tom will have earned 4,250 Grands, Bob will have 2,100 Grands, and Kelly will have 1000 Grands.

$$\begin{aligned} \text{Tom} &= (500 \times 8) + (5 \times 50) = (4,000) + (250) = 4,250 \text{ Grands} \\ \text{Bob} &= (200 \times 8) + (10 \times 50) = (1,600) + (500) = 2,100 \text{ Grands} \\ \text{Kelly} &= (0 \times 8) + (20 \times 50) = 0 + 1000 = 1000 \text{ Grands} \end{aligned}$$

The Grand reward for this first week was automatically determined to be 7,350 Grands.

Grand Tokens Deflationary System

The community is the heart of the entire Grand Time ecosystem. That's why we **give back 100 % of task earnings back to the community while burning all sold tokens!**

Grand Time team developed a Grand Tokens Deflationary Mechanism that gives back a 100% of all crowdsourcing marketplace earnings back to the community by exchanging their earned tokens to other cryptocurrencies inside of the platform without moving it on-chain & selling it on external exchanges.

All funds generated through our Decentralized Crowdsourcing Marketplace, are deposited to the Grand Exchange Program Wallet. When users want to exchange their grand tokens for other cryptocurrencies they are able to pick the desired crypto and swap it instantly and effortlessly. All exchanges are regulated by supply & demand exchange mechanism.

Furthermore, Grand Tokens Deflationary System works that way, that it **burns all the deposited Grand tokens as a deflationary mechanism** providing stability and maintaining the constant deflation of the Grand Token.

All this works as a massive incentive to grow the community even faster, increase the value of the Grand ecosystem and Grand Token, and motivate Grand members to do even more tasks, advertising the project and helping it have the largest & most active crypto community.

GRAND SCHOOL

In the world of extreme development, speed and rapid internet, it is hard to keep up with every technology trend. There is a scarcity of people who actually understand the details behind blockchain, cryptocurrencies, DeFi, and tokenization.

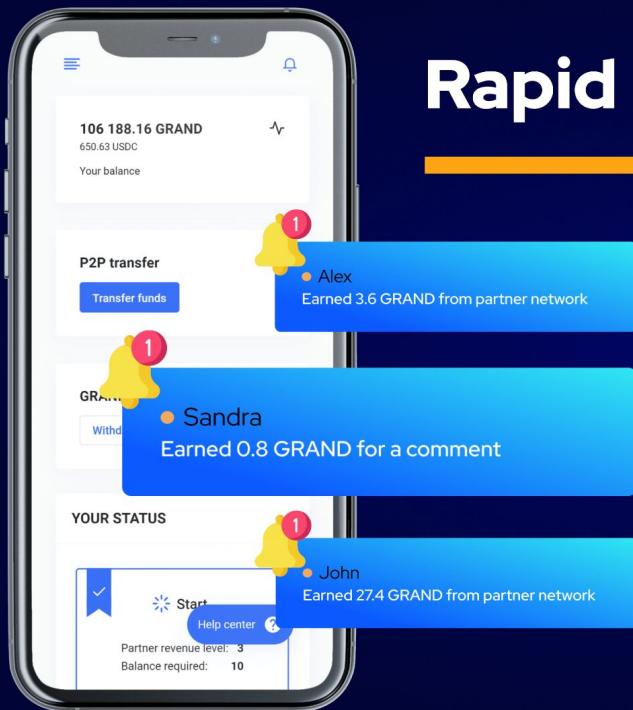

Grand School was created to educate new people on how to perform simple GIG tasks and earn Grand rewards on the platform. As well as basics of crypto and blockchain technology with the help of one on one mentorship of more experienced Grand Time' users.

Grand Time has turned learning about blockchain & cryptocurrency into a social, community-oriented experience.

Unlike other educational platforms, Grand School provides personal mentor to each new platform user. Mentors are existing community members who have completed our Grand School and earning Grand Tokens by educating new users on top of video lessons. The help of a real person provides invaluable advice and help to beginners in the crypto ecosystem. In addition to this the Grand School mentors stream live educational classes every week to enhance the new users experience & provide more value.

LEGAL DISCLAIMER

PLEASE READ THIS DISCLAIMER SECTION CAREFULLY. THIS DOCUMENT IS CREATED SOLELY FOR INFORMATIONAL PURPOSES ABOUT THE GRAND TIME PROJECT.

NOTHING IN THIS WHITE PAPER CONSTITUTES, OR IS INTENDED TO BE CONSTRUED AS, AN OFFER TO ISSUE, ALLOT, SELL, OR OTHERWISE TRANSFER, OR AN INVITATION, ADVERTISEMENT, SOLICITATION, RECOMMENDATION, ADVICE, OR INDUCEMENT TO INVEST IN OR MAKE A COMMITMENT TO INVEST IN, ANY SECURITIES, OPTIONS, OTHER FINANCIAL INSTRUMENTS OR OTHER ASSETS, WHATSOEVER.

THIS DOCUMENT IS NOT INTENDED TO GIVE AND DOES NOT CONTAIN ANY SORT OF PERSONAL, LEGAL OR FINANCIAL ADVICE. IT IS HIGHLY RECOMMENDED TO CONSULT YOUR OWN LEGAL AND/OR FINANCIAL EXPERTS FOR FURTHER GUIDANCE.

1. The main goal of this White Paper is to introduce the Grand Time Project (the “Project”) and Grand Tokens to the potential token-holders in light of the forthcoming Grand Token Launchpad, the Grand Token Sale.
2. The information set forth below cannot be exhaustive and does not imply any elements of contractual relations. Its sole purpose is to provide relevant and up-to-date information about the Grand Time Project and the team behind the project to the potential token-holders in order to determine whether to conduct a more thorough analysis about the Project with the intention to purchase Grand Tokens.
3. Although this White Paper aims to provide the most relevant and accurate information, the information set forth in this document is only intended to provide general and preliminary information to the potential token-holders and shall not be construed as the basis of any investment decision or strategy. This document in no way constitutes professional advice.
4. Nothing in this White Paper can be considered or construed as forming part of the prospectus of any kind. The information provided in this document has no relation to the securities offering in any jurisdiction.
5. This document is not made in accordance with the laws or regulations of any jurisdiction since it carries the informational purpose only and is not, therefore, subject to the laws and regulations designed to protect purchasers of Grand Tokens.
6. We are only intended for public sale in jurisdictions where no securities regulatory regime has been imposed on tokens by authorized governmental bodies. Potential purchasers from the abovementioned jurisdictions may purchase Grand Tokens via the Token Sale in accordance with the Grand Token Sale Terms and Conditions and this White Paper.
7. The Grand Project shall be legally incorporated and structured under the laws of Seychelles, due to its favorability for blockchain businesses as of the combination of the English Common Law-based legal system and a friendly business climate.

GRAND TIME WHITEPAPER

8. Additionally, Seychelles place a great importance on protecting the clients' rights and interests and have enacted a strict AML regulation, which we are committed to abide by.

9. So far, Seychelles took a 'wait and see' approach towards blockchain regulation, but started the development of FinTech regulation in 2018. Should any regulations be put in place, we are committed to receive any permits and undergo any compliance procedures necessary. A local financial regulator, the Financial Services Authority (the "FSA"), has stated that no blockchain businesses are currently regulated (licensed) by the FSA despite many saying they are regulated in Seychelles. Such businesses are not currently caught by the Financial Services Authority Act and, therefore, are not subject to licensing. Since there is no blockchain-specific legislation in Seychelles right now, the main question regarding the Grand Project is whether it is caught under local securities legislation. As of now, since no blockchain businesses have been licensed by the FSA under the Securities Act as well, we believe that the Project, nor its native tokens would fall under its scope. However, should it change at any time in the future, we shall receive all necessary permits, if any.

10. The Grand Token is not intended for sale or use in any jurisdiction where the sale or the use of digital tokens is prohibited. The Grand Token is not intended for public sale where such tokens may be considered securities. For persons from such jurisdictions, this White Paper is for informational purposes only. The company reserves the right to conduct a verification procedure in accordance with our AML Policy that can be accessed on our website. For more information on the jurisdictions that are excluded or restricted from the public token sale, please refer to the Grand Token Sale Terms and Conditions that can be accessed on the Website. **Please read the Grand Token Sale Terms and Conditions carefully before purchasing any Grand Tokens.**

11. The Grand Token does not give and cannot be construed to give any financial, legal or other rights in any form apart from the rights expressly defined in the Grand Token Sale Terms and Conditions. In case of differences in the Grand Token definition in the White Paper and the Grand Token Sale Terms and Conditions, the Grand Token Sale Terms and Conditions definition shall prevail.

12. The risk of purchasing tokens is high given the unstable regulatory frameworks, market volatility and fluctuations. Thus, only purchasers that have a sound understanding of the way blockchain industry operates and those that have read the risk warning contained in the Grand Token Sale Terms and Conditions, the latest version of which can be accessed on our Website, should purchase the Grand Tokens.

13. Some of the statements in the White Paper include forward-looking statements which reflect the Company's and/or the Directors' current views with respect to financial performance, business strategy and future plans, both with respect to the Token Sale and the sectors and industries in which the Company operates. Statements which include the words "expects", "intends", "plans", "believes", "projects", "anticipates", "will", "targets", "aims", "may", "would", "could", "continue" and similar statements are of a future or forward-looking nature. Such forward-looking statements or information include known and unknown risks and uncertainties, which can lead to the situation when the actual events or results materially differ from the statements and estimates implied or expressed in such forward-looking statements.

GRAND TIME WHITEPAPER

14. All forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause the Company's actual results to differ materially from those indicated in these statements. These factors include, but are not limited to, those described in the part containing risk warnings in the Token Sale, which should be read in conjunction with the other cautionary statements that are included in the Grand Token Sale Terms and Conditions. Any forward-looking statements in the White Paper reflect the Company's current views with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to the Company's operations, results of operations and growth strategy.
15. These forward-looking statements speak only as of the date of the latest uploaded version of the White Paper in English. The Company undertakes no obligation publicly to update or review any forward-looking statement, whether as a result of new information, future developments or otherwise. All subsequent written and oral forward-looking statements attributable to the Company or individuals acting on behalf of the Company are expressly qualified in their entirety by this paragraph. Prospective token-holders should specifically consider the factors identified in the Grand Token Sale Terms and Conditions which could cause actual results to differ before making a decision to purchase Grand Tokens.
16. This White Paper can be amended at any time to provide more detailed information or reflect some changed circumstances. In such cases, the latest version of the document shall prevail over the older version. We do not undertake to notify you of any changes. The latest version of the document can be accessed via our Website.
17. Although we make every effort to ensure that the latest version of the White Paper uploaded on the Website is relevant and accurate, you must not rely on the information provided in this document as an alternative to the qualified professional advice from the third party.
18. If you have any specific questions about any legal, financial, taxation or other issues, you should consult an appropriately qualified professional.
19. This document in the English version is the main official source of information about the Token Sale and the Grand Project.
20. Information contained in this document may, from time to time, be translated into other languages or used in writing or verbally to communicate with the existing or potential clients, partners etc. In case there is a conflict or inconsistencies between the translated versions and the official document in English, the provisions contained in an official document in English shall prevail.
21. The Company will not be liable to you in respect of any business losses, including without limitation loss of or damage to profits, income, revenue, use, production, anticipated savings, business, contracts, commercial opportunities or goodwill that may arise directly or indirectly from the document.
